Profile

https://my-portfolio-f0225b.netlify.app/

HELLO there! my name is Ogunsola Toluwalase and I'm a dynamic, passionate and result oriented Frontend engineer. I offer extensive skill set in frontend development and effective problem-solving skills. I'm highly educated in various programming languages and tools and I'm looking for a position in a fast-paced company that appreciates hard work, dedication and evolving skills. Asides programing, I also possess other useful skills such as brainstorming marketing ideas, adaptability and planning. I am dedicated to self-development to provide high level expectation-exceeding service. Asides my technical skills I also possess very valuable soft skills such as:

. Team-spirit

. Articulate communication.

. positive discipline.

. Teamwork

. Emotional intelligence.

Throughout my career as a Frontend engineer, I've focused on developing scalable and well documented code. I enjoy working collaboratively as a very good team player, but I can also run projects on my own if needed. I really am excited about the prospect of joining a goal driven company such as yours.

EXPERIENCE.

WEB AND MOBILE FRONTEND ENGINEER

(Freelance and Contract).

- Took part in application design and planning, contributing to achieve optimal user interface and experience
- Built the logic for a streamlined E-commerce application for a Company that scaled, leveraging AI tools such as the Ailab API
- Collaborated with multiple Backend-as-a-Service (BaaS) platforms such as Appwrite, Supabase, and Firebase to build scalable and efficient full-stack applications.
- Tested Web and Mobile Applications for potential bugs, operating speed and potential test cases.
- Worked with multiple Backend as service tools such as SupaBase and AppWrite to deliver top notch web and mobile applications.
- Developed processes to increase efficiency and speed by at least 18% in the admin portal of a social media platform.
- Built complex SASS applications using React NextJs, TypeScript and TailwindCSS.
- Worked with Various content platforms such as GraphCMS and Sanity.io to create software that scaled.
- Worked with various forms API's and data sources to develop web and mobile applications.
- Delivered smooth and efficient front-end applications written in React.js and NextJS with maximum optimization targeting a smooth user experience.
- Worked with various forms of API such as REST and Graphql to develop smooth, responsive and optimized applications
